Professional Summary

Full-stack developer specializing in React, JavaScript, and modern web technologies. Experienced building responsive applications with authentication, REST APIs, and full deployment pipelines. Strong problem-solver with hands-on project and externship experience.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend: React, JSX, Tailwind CSS, Context API, Responsive Design
Backend: Node.js, Express.js, Prisma, PostgreSQL, MongoDB, REST APIs, JWT Auth
Tools: Git, GitHub, Postman, npm, VS Code, Render, Netlify

Experience

TripleTen Software Engineering   *April 2024 – Sep 2025*
Software Engineering Extern

- Built full-stack features using TypeScript, React, Express, Prisma, and PostgreSQL.
- Developed secure REST APIs with CRUD operations, authentication middleware, and validation.
- Created dynamic React UI with filtering, pagination, and workflow dashboards.
- Designed secure upload verification with token validation and expiration logic.

Fox Finance Software Engineering Externship — Remote   *Nov 2025 – Jan 2026*
Software Engineering Extern

- Built responsive frontend components using React, JavaScript, and modern CSS.
- Integrated REST APIs to display dynamic financial data and user interactions.
- Collaborated using Git and GitHub in a team-based development workflow.
- Improved UI usability and performance through reusable component design.

Independent Developer — Remote   *2024 – Present*
Full-Stack Developer

- Designed and deployed full-stack applications using React, Node.js, and databases.
- Implemented authentication, API integration, and responsive UI patterns.
- Built and deployed personal portfolio and full-stack applications.

Projects

News Explorer — Full-Stack Application   *2025*

- Built JWT authentication, article saving, and News API integration.
- Developed responsive UI with modals, protected routes, and full deployment.

WTWR React App — Frontend Application   *2025*

- Built authentication modals, profile editing, and global state using Context API.
- Implemented responsive UI and modern React architecture.

Lover's Slow Jamz — CodeJam Winner   *2025*

- Collaborated in a team to build a playlist-driven date planner application.
- Won TripleTen CodeJam for innovation and user experience design.
